LinkedIn: linkedin.com/in/sanjaygl2006

## PROFESSIONAL SUMMARY

Motivated Full-Stack Web Developer and AI/ML enthusiast pursuing BCA (3rd Year) at PESIAMS. Demonstrated expertise in building production-ready Web Applications, REST APIs, Deep Learning models, and automated database migration workflows. Proven track record of developing 35+ full-stack projects, implementing robust CI/CD pipelines, and writing clean, scalable Python and JavaScript code.

## TECHNICAL SKILLS

|                        |                                                                                     |
|------------------------|-------------------------------------------------------------------------------------|
| Languages & Core:      | Python, JavaScript (ES6+), TypeScript, C, C++, Java, HTML5, CSS3, SQL               |
| Frameworks & Web:      | React.js, Flask, FastAPI, Node.js, Express, Tailwind CSS, Bootstrap, REST APIs      |
| AI & Machine Learning: | TensorFlow, Keras, PyTorch, OpenCV, Scikit-Learn, Pandas, NumPy, YOLOv8, Gemini API |
| Databases & Cloud:     | SQLite, MySQL, PostgreSQL, Supabase (Vector DB & Auth), Google Cloud Run, Vercel    |
| Tools & Platforms:     | Git, GitHub, Docker, Kubernetes, Linux (Bash), VS Code, ReportLab, Postman          |

## WORK & INTERNSHIP EXPERIENCE

### AI / ML Intern

2026 – Present

Milano Infotech — Shivamogga, Karnataka

- Architecting deep learning models and image recognition pipelines using OpenCV and TensorFlow.
- Integrating AI/ML model inference endpoints with Flask/FastAPI REST APIs for production environments.
- Assisting in dataset preprocessing, validation scoring, and real-time inference optimization.

### Web Development & Engineering Intern

2025

Oasis Infobyte — Remote

- Developed responsive, cross-browser web interfaces utilizing HTML5, CSS3, JavaScript, and React.
- Built interactive UI components, form validation engines, and serverless backend integrations.
- Collaborated on code reviews, version control workflows, and UI component optimization.

## FEATURED PROJECTS

### DataGauge — Dataset Quality Monitoring System

Python, FastAPI, React, Pandas, SQLite

- Engineered full-stack platform for CSV/Excel file validation, automated 0–100 quality scoring, and PDF report generation.

### DermAI — AI-Powered Skincare Diagnosis App

Python, Flask, TensorFlow, OpenCV

- Developed CNN model (94% accuracy) screening skin lesions with web triage guidance and patient summaries.

### Paperless Office & Billing Management System

Node.js, Electron, SQLite, PDFKit

- Created desktop billing system managing inventory tracking, tax calculations, and instant PDF invoicing.

### Accident Risk Prediction System

Flask, Scikit-Learn, Random Forest

- Implemented Random Forest ML model (98% accuracy) analyzing traffic parameters to predict road risk zones.

## EDUCATION & CERTIFICATIONS

### Bachelor of Computer Applications (BCA)

2023 – Present (3rd Year)

PES Institute of Advanced Management Studies (PESIAMS) — Shivamogga, Karnataka

- Relevant Coursework: Data Structures, Database Management Systems (SQL), Operating Systems, Computer Networks.

### 30-Hour Blockchain Technology Certification

PESIAMS (2026)

- Verified Certifications: 90+ verified industry certifications in Web Development, Python, Cybersecurity, and AI.

## LEADERSHIP & COMMUNITY INVOLVEMENT

- NSS & Youth for Seva Volunteer: Active member of National Service Scheme (NSS) and Youth for Seva (YFS), organizing community outreach and tech literacy programs.
